Product Description

Regular Style Metal Carport 18x26x11 with 6' Side Panels

The 18x26x11 Regular Style Metal Carport with 6-foot side panels is designed to provide covered protection for vehicles, RVs, boats, and outdoor equipment. Featuring a durable steel frame, 26-gauge steel roofing, and sidewall panels with J-Trim, this carport offers additional side coverage while maintaining open access. It is suitable for both residential and commercial applications and can be customized to fit specific property requirements.

Best For

- RV storage and weather protection
- Boat storage
- Vehicle parking and coverage
- Outdoor equipment storage
- Residential property coverage needs
- Commercial vehicle protection

What Fits Inside

With an 18-foot width and 26-foot length, this carport provides substantial covered space for a variety of storage and parking needs.

Potential uses include:

- One RV or motorhome, depending on dimensions
- One boat and trailer
- Multiple passenger vehicles
- Utility trailers and recreational equipment
- Lawn and property maintenance equipment

The open-sided design combined with 6-foot side panels allows for convenient access while providing additional side protection.

Build Quality & Materials

This [metal carport](#) is constructed using quality steel components designed for long-term durability and structural performance.

- 26-gauge steel roofing provides dependable overhead coverage

- Factory-direct pricing
- Free delivery
- Free installation
- Permit service available

Customers should [contact Handi-House](#) for site preparation requirements and installation scheduling details. [Click for more question.](#)

Decision Guidance

The 18x26x11 carport is a practical option for customers seeking covered protection for larger vehicles, boats, RVs, or equipment without requiring a fully enclosed structure.

This size may be appropriate if:

- You need coverage for an RV or boat
- You want additional side protection through 6-foot side panels
- You need a versatile residential or commercial carport
- You prefer open access for parking and equipment storage

If you require enclosed storage, security, or workshop space, a metal garage or enclosed building may be a better fit.
