Product Description

12x21 Regular Style Metal Carport | 12W x 21L x 6H Steel Carport with 26 Gauge Roofing and 14 Gauge Frame

The 12x21 Regular Style Metal Carport is a compact steel structure designed to provide dependable coverage for vehicles, equipment, or general storage needs. Built with durable steel framing and roofing, this [carport steel](#) is suitable for residential or light commercial use where basic overhead protection is needed. It is ideal for homeowners looking for a simple, functional solution to protect assets from sun, rain, and everyday exposure.

Best For

- Protecting a single small vehicle such as a car or compact SUV
- Basic residential storage coverage
- Light equipment or outdoor item protection
- Driveway or side-yard installation where space is limited
- Budget-friendly vehicle shelter solutions

What Fits Inside

The 12x21 footprint provides practical coverage for everyday storage needs. It is best suited for:

- One standard-sized vehicle with minimal extra clearance
- Small equipment such as lawn tools, bins, or outdoor supplies
- Partial side storage depending on placement and access needs

This size is ideal when you need essential protection without requiring a fully [enclosed garage structure](#).

Build Quality & Materials

This carport is constructed using strong steel components designed for long-term structural reliability:

- 26 gauge steel roofing for durable overhead protection
- 14 gauge steel framing (upgrade available) for structural support
- Regular style roof design for a clean and simple profile
- Engineered wind rating of 150-170 mph for regional durability considerations

These materials provide a solid balance of strength and affordability for everyday protection needs.

Customization Options

Available customization options include:

- 15+ color choices for exterior finish
- Custom size and layout options available
- Engineering plans available for permitting requirements
- [3D Builder tool for design visualization](#)
- Permit service available for installation approval support

Customization is based on available manufacturer options and selected configuration.

- [Rent-to-own program available through Handi-House](#)

Delivery & Installation

This building includes:

- Free delivery
- Free installation

Handi-House provides a straightforward ordering process designed to simplify purchasing and setup from selection through installation.

Decision Guidance

The 12x21 carport is a practical choice when you need basic vehicle protection in a compact footprint. It works well for standard residential driveways or areas where space is limited.

You may want a larger size if:

- You need coverage for oversized vehicles or trucks
- You require additional storage space alongside parking

You may consider a smaller option if:

- You only need partial coverage or minimal overhead protection
