Product Description

26x36 Metal Garage with Carport and Dual Roll-Up Doors

The 26x36x9 metal garage with carport is designed for residential and light commercial storage needs. Featuring all-vertical siding, dual 8x8 roll-up doors, and additional frame-out openings, this [steel garage](#) provides flexible space for vehicle storage, equipment organization, or workshop use. With customizable layout options and multiple color choices available, this building is suited for buyers looking for a practical 2 car garage with workshop potential.

Best For

- Two-vehicle storage
- ATV, mower, and equipment storage
- Residential garage use
- Light workshop or hobby workspace
- Combined garage and storage applications
- Homeowners needing additional covered space
- Small business or contractor equipment storage

What Fits Inside

With a 26x36 footprint, this metal garage with carport offers practical space for multiple uses. The dual 8x8 roll-up doors support easy vehicle access, while the additional frame-out openings provide flexibility for future customization or layout adjustments.

This building may comfortably accommodate:

- Two standard vehicles
- A combination of vehicles and workshop space
- Lawn equipment and storage shelving
- Utility trailers, motorcycles, or ATVs
- Tools and seasonal storage items

The 36-foot length allows room for organizing storage along the walls while maintaining usable floor space for parking or workspace needs.

Build Quality & Materials

This 26x36 steel garage is constructed with 26-gauge sheet metal and heavy-duty 14-gauge framing. The all-vertical siding design helps support water runoff and provides a clean, modern appearance.

Key structural features include:

- 26-gauge steel sheeting
- 14-gauge framing
- Upgrade options available for framing
- Vertical siding configuration
- Engineered for 150-170 MPH wind loads
- Engineering plans available
- Residential and commercial use compatibility

The steel construction is designed for durability while remaining low maintenance compared to many traditional building materials.

Customization Options

[Handi-House](#) offers several customization options for this metal garage with carport configuration.

Available options include:

- Custom sizes and layouts
- 15+ color choices
- Framing upgrades
- Additional layout modifications
- Engineering plans

- Free delivery
- Free installation
- Permit service availability

Delivery and installation availability may vary based on location and site conditions. Buyers should contact the dealer for property preparation requirements and scheduling details.

Is a 26x36 Garage the Right Size?

A 26x36 metal garage is a practical option for buyers needing more than basic two-car parking space. The layout works well for homeowners wanting a 2 car garage with workshop functionality or extra storage flexibility.

This size may be appropriate if you need:

- Parking for two vehicles with additional storage space
- Room for tools, lawn equipment, or hobby work
- A combination garage and workspace setup
- Covered storage for equipment or trailers

Buyers needing larger commercial storage capacity or additional enclosed bays may want to consider a larger building configuration.
