Product Description

30x61x14 All Vertical Metal Garage with Dual 12x12 Roll-Up Doors

The 30x61x14 All Vertical Garage is a prefabricated steel building designed for vehicle storage, equipment protection, workshop space, and general residential or commercial use. With dual 12x12 chain drive roll-up doors, vertical siding, and a tall 14-foot height clearance, this garage offers flexible access and practical interior space for a wide range of storage and work applications.

Built with 26-gauge steel sheeting and 14-gauge framing, this structure is designed to provide dependable coverage while allowing customization options to match different property layouts and storage needs.

Best For

- Vehicle storage for cars, trucks, trailers, or work vehicles
- Equipment and tool storage
- Residential garage use
- Commercial storage applications
- Light workshop or hobby workspace
- Agricultural or property maintenance storage

What Fits Inside

With a 30-foot width and 61-foot length, this garage provides substantial covered space for organizing vehicles, tools, and equipment.

Potential uses include:

- Multiple vehicle parking
- Trailer or utility vehicle storage
- Lawn and landscaping equipment storage
- Dedicated workspace areas
- Combination garage and storage setup

The 14-foot leg height and dual 12x12 roll-up doors allow easier access for taller vehicles and equipment while helping improve interior usability.

Build Quality & Materials

This building features an all-vertical roof and siding configuration, which helps guide water, debris, and snow downward more efficiently compared to horizontal panel layouts.

Key construction details include:

- 26-gauge steel sheeting
- 14-gauge steel framing
- All vertical siding and roof system
- Two-tone color design
- Wind load rating of 150-170 MPH
- Framing upgrade availability

The steel framing system is designed to provide structural support while maintaining flexibility for different layout configurations.

Customization Options

This [prefabricated steel garage](#) can be customized based on your property and usage requirements.

Available options include:

- Custom sizes available
- Custom layout options
- 15+ color choices
- Two-tone color combinations
- Framing upgrades available

- Free delivery
- Free installation
- Factory-direct pricing
- Permit service availability

Engineering plans are also available for projects requiring permitting or site approval.

Is This Garage the Right Size?

A 30x61x14 garage is a practical option for buyers needing substantial covered space for multiple vehicles, larger equipment, or combined storage and workspace use.

This size may work well if you need:

- Taller door clearance
- Long-term equipment storage
- Extra room for organization and workspace separation
- Commercial or residential flexibility

Buyers needing only basic vehicle coverage or limited storage may prefer a smaller structure, while larger commercial operations may require expanded width or additional bays.
