Product Description

Handi-House 8x10 Greenhouse

- Clear Poly-Carbonate panels with Galvalume Trim
- Fan / Thermo
- 2 windows
- 1 lights
- 1 receptacles
- StD door 36x72 greenhouse door

Green Houses are available in mist green fiberglass or clear poly-carbonate panels made specifically for greenhouse use. The framing is constructed of strong 18 or 20-gauge steel galvanized studs.

All units are standard without a floor that enables you to use bark, gravel, or whatever you think best absorbs the water that is used when you water your plants. We also offer two or three different flooring systems upon your request. All units are standard with wiring in 1/2" EMT conduit with lights and receptacles, wire mesh shelving on three walls, and a 32" mobile home-type door with a window for extra ventilation. Options include thermostat-controlled exhaust fans and sprinkler systems.
