Product Description

20x31x10 Residential Metal Garage with Dual Roll-Up Doors

The 20x31x10 Residential Metal Garage is designed for homeowners seeking a durable and versatile enclosed storage solution for vehicles, equipment, and general property storage. Featuring dual roll-up doors, vertical steel siding, multiple windows, and a walk-in entry door, this garage provides convenient access and functional interior space for a variety of residential applications.

Best For

- Vehicle storage
- Residential equipment storage
- Lawn and garden equipment storage
- ATV and recreational vehicle storage
- Hobby and project workspace
- General household overflow storage
- Property maintenance equipment storage

What Fits Inside

With a 20-foot width and 31-foot roof length, this garage offers flexible space for vehicle and storage needs. Potential uses include:

- Multiple passenger vehicles
- A vehicle plus additional storage space
- Lawn mowers and outdoor power equipment
- ATVs, motorcycles, and recreational equipment
- Shelving and organizational systems
- Household storage items and seasonal equipment

The dual roll-up door configuration allows separate access points, making it easier to organize vehicles and

stored belongings within the structure.

Build Quality & Materials

This [residential garage](#) is constructed using a steel framing system paired with durable steel roofing and siding materials.

Key construction features include:

- 26-gauge steel roofing
- 14-gauge steel framing
- Vertical steel siding design
- Wind load rating of 150-170 MPH
- Engineering plans available
- Framing upgrade options available

The vertical steel siding and roofing design helps provide a clean appearance while maintaining a consistent

steel building structure throughout the garage.

Customization Options

This building can be customized to better match your property and storage requirements.

Available options include:

- Custom building sizes
- Custom layouts
- 15+ color choices
- Framing upgrades
- Engineering plans
- 3D building design options
- Permit service availability

[3D customization availability](#) may vary based on project requirements and location.

Decision Guidance

The 20x31x10 Residential Metal Garage is a practical choice for property owners who need enclosed storage space for vehicles, equipment, and household items while maintaining convenient access through dual roll-up doors.

This size may be a good fit if you need:

- Dedicated vehicle storage with additional storage space
- A larger residential garage footprint
- Storage for outdoor power equipment and recreational vehicles
- An enclosed structure with natural light from multiple windows

If your storage needs involve larger equipment fleets, additional vehicles, or expanded workspace requirements, you may want to explore larger building configurations. For more compact storage needs, a smaller garage layout may be sufficient.
