Product Description

20x36x14 Utility Metal Garage with Dual 12x12 Roll-Up Doors

The 20x36x14 Utility Metal Garage is a spacious steel building designed for vehicle storage, equipment protection, and general-purpose workspace needs. With two large 12x12 roll-up doors, a walk-in door, and a window for natural light, this garage provides practical access and functionality for residential or commercial applications.

Best For

- Storing trucks, trailers, and larger vehicles
- Equipment and machinery storage
- Utility vehicle protection
- General storage needs
- Light workshop applications
- Residential and commercial property use

What Fits Inside

With 720 square feet of covered space, this 20-foot-wide by 36-foot-long garage offers room for a variety of storage and workspace needs.

Potential uses include:

- Multiple vehicles parked side by side
- Trucks, utility trailers, or work vehicles
- Lawn and landscaping equipment
- Storage for tools, supplies, and materials
- Dedicated workspace alongside storage areas

The 14-foot building height and dual 12x12 roll-up doors provide generous clearance for larger vehicles and equipment requiring taller entry access.

Build Quality & Materials

This [utility garage](#) is constructed with durable steel components designed to provide reliable protection and long-term performance.

Key construction features include:

- 26-gauge steel roofing
- 14-gauge steel framing
- Framing upgrade options available
- Engineered to accommodate 150–170 MPH wind loads
- Steel construction designed for residential and commercial applications

The combination of heavy-duty framing and steel roofing creates a practical storage solution suitable for a wide range of property needs.

Customization Options

This building can be configured to better match your property and intended use.

Available options include:

- Custom size modifications
- Custom layout configurations
- 15+ color choices
- Framing upgrades
- Engineering plans available
- Permit service available

Use [Handi-House's 3D Builder](#) to explore available customization options and visualize your building before ordering.

Decision Guidance

The 20x36x14 Utility Metal Garage is a strong choice for buyers needing significant storage capacity combined with tall door clearances. It is well suited for larger vehicles, equipment storage, and properties that require versatile covered space.

If your primary need is standard passenger vehicle storage, a smaller garage may be sufficient. If you require additional storage bays, workshop space, or expanded equipment storage, you may want to consider a larger building footprint or customized layout.
