Product Description

30x60x14 Metal Workshop Garage with Four 12x12 Roll-Up Doors

The 30x60x14 Metal Workshop Garage is a large steel building designed for customers who need substantial covered space for vehicle storage, equipment protection, workshop activities, or commercial operations. Featuring four 12x12 roll-up doors, durable steel construction, and lap siding, this building offers flexible access and a spacious interior suitable for both residential and commercial applications.

Best For

- Multi-vehicle storage
- Equipment and machinery storage
- Large residential garage applications
- Commercial workshop operations
- Contractor equipment storage
- Agricultural equipment protection
- Fleet vehicle storage
- Combined workspace and storage needs

What Fits Inside

With approximately 1,800 square feet of covered space, this workshop garage provides ample room for a variety of storage and work applications.

Potential uses include:

- Multiple cars, trucks, or SUVs
- Utility trailers and work trailers
- Lawn and landscaping equipment
- Agricultural machinery
- Commercial vehicles
- Dedicated workshop and fabrication areas
- Storage shelving and organizational systems

- Combined vehicle storage and workspaces

The four 12x12 roll-up doors allow convenient access from multiple bays, making it easier to organize equipment, vehicles, and work areas efficiently.

Build Quality & Materials

This [Metal workshop garage](#) is constructed with durable steel components designed for long-term performance and structural reliability.

Key construction features include:

- 26-gauge steel roofing
- 14-gauge steel framing
- Lap steel siding
- Wind load rating of 150-170 MPH
- Engineering plans available
- Framing upgrade options available

The steel roof and framing system provide a strong structure suitable for a wide range of residential and commercial uses while maintaining a clean, professional appearance.

Customization Options

This building can be configured to meet specific site and usage requirements.

Available options include:

- Custom sizes available
- Custom layout configurations available
- Framing upgrades available
- More than 15 color choices
- Engineering plans available
- Additional design adjustments through [Handi House's 3D Builder](#)

Decision Guidance

The 30x60x14 Workshop Garage is a strong choice for customers who need significant storage capacity, multiple access points, and dedicated workspace under one roof.

This size may be appropriate if you need:

- Storage for multiple vehicles
- Equipment and machinery protection
- A large workshop environment
- Commercial or contractor operations
- Combined storage and work areas

If your needs are limited to a few vehicles or smaller storage requirements, a smaller garage may be sufficient. If you require additional clearance, storage capacity, or future expansion space, you may wish to explore larger custom building configurations.
