Product Description

20x41x12 Regular Style Metal Carport - 26 Gauge Steel Roofing with 14 Gauge Framing (Upgrade Available)

The 20x41x12 Regular Style Metal Carport is a [prefabricated carport steel](#) structure designed to provide reliable overhead protection for vehicles, equipment, and general storage needs. Offered by Handi House, this carport is suitable for residential and light commercial use where open-sided, accessible coverage is preferred. Its extended 41-foot length makes it a practical option for multiple vehicles or larger equipment storage.

Best For

- Vehicle protection for cars, trucks, or SUVs
- Covered storage for trailers, lawn equipment, or machinery
- Residential driveway or property coverage
- Light commercial storage and utility use
- Open-air workshop or work coverage space

What Fits Inside

With a 20-foot width and 41-foot length, this carport can typically accommodate:

- Multiple standard-sized vehicles parked in line

- Larger equipment or utility trailers depending on layout
- Combined vehicle and storage setups along one or both sides

The 12-foot height provides clearance suitable for most standard vehicles and select taller equipment, depending on configuration.

Build Quality & Materials

This structure is built using durable steel components designed for long-term outdoor exposure:

- 26 gauge steel roofing for durable overhead coverage
- 14 gauge steel framing (upgrade available for added structural strength)
- Engineered wind load rating of 150-170 mph (based on configuration and installation)
- Regular style roof design for a balanced, practical profile
- Frame is 1 foot shorter than roof lengthwise for structural design alignment

These materials are selected to provide a strong, low-maintenance steel structure suitable for various climates and uses.

Customization Options

Available customization includes:

- Custom sizes and layout adjustments
- 15+ color options
- Engineering plans available upon request
- Optional framing upgrades
- [Test Hand House 3d Builder](#)

Customization is designed to support different property layouts and functional requirements.

Standard Features & Specifications

Decision Guidance

This 20x41x12 carport is well-suited for users who need extended covered space without fully enclosing a

structure. It works best when:

- You need multi-vehicle or extended-length coverage
- You prefer open-sided access for easy entry and exit
- You want a flexible structure for both storage and parking

If your needs require enclosed security or insulated storage, a fully enclosed garage or workshop may be a more appropriate alternative within the available product range.
