Product Description

22x21x10 Regular Style Metal Carport

The 22x21x10 Regular Style Metal Carport is designed to provide covered outdoor protection for residential and commercial applications. Its open-sided design makes it a practical choice for protecting vehicles, equipment, or other outdoor items while offering customization options to match your property and storage needs.

Best For

- Residential vehicle protection
- Covered parking for cars, SUVs, or light trucks
- Farm and ranch equipment coverage
- Outdoor equipment storage
- Commercial parking areas
- General-purpose covered outdoor space

What Fits Inside

With a 22-foot width, 21-foot length, and 10-foot height, this metal carport provides ample covered space for everyday storage needs. Depending on vehicle size, it can accommodate multiple passenger vehicles or provide room for a combination of vehicle parking and equipment storage. The open design also allows convenient access from multiple sides while leaving space for organizing outdoor items beneath the roof.

Build Quality & Materials

Built with 26-gauge steel roofing, this [steel carport](#) is supported by 14-gauge steel framing, with an upgraded framing option available for customers seeking a different frame specification. The structure is engineered to meet 150-170 MPH wind load ratings where applicable, and engineering plans are available to assist with permitting and project planning when needed.

Customization Options

Customize your metal carport with available options including:

- Custom sizes available
- Custom layout options
- 15+ color choices
- 14-gauge framing upgrade available
- Engineering plans available
- Interactive 3D Builder for design customization

- Factory-direct pricing
- Free delivery
- Free installation

- Permit service available

Delivery and installation availability may vary by location. Contact your local dealer for details. [Click here for more question](#)

Choosing the Right Size

A 22x21 Regular Style Metal Carport is well suited for homeowners and businesses looking for covered parking or equipment protection without fully enclosing the structure. If you anticipate storing larger equipment or need [enclosed storage](#), a metal garage or workshop may be a better fit. For more compact vehicle coverage, a smaller carport may better suit your available space.
