Product Description

8×16 Cottage Building | Portable Cabin & Storage Building

- BUILT TO ORDER.
- TURNKEY

The 8×16 Cottage Building is a built-to-order portable structure designed for homeowners who need flexible storage or a functional backyard space. Whether you're looking for a portable cabin, storage building, or a compact tiny home-style structure, this model offers durable construction, customizable options, and financing solutions to fit a variety of residential needs.

Best For

- Secure residential storage
- Lawn and garden equipment storage
- Seasonal decorations and household items
- Hobby or craft space
- Backyard office or creative workspace
- Portable cabin applications
- Tiny home-style projects (subject to local building codes and intended use)

What Fits Inside

With an 8×16 footprint, this [prefab portable building](#) provides ample room for organizing a wide range of belongings while maintaining a compact size that fits many residential properties.

It can comfortably accommodate:

- Lawn mowers and yard equipment
- Bicycles and outdoor recreational gear
- Pool supplies and patio furniture
- Shelving systems for organized storage
- Workbenches for light hobby projects
- Household overflow storage

Its open interior also provides flexibility for buyers planning a portable cabin or compact backyard retreat, depending on local regulations and intended use.

Build Quality & Materials

Built with quality materials and practical construction features, this 8×16 Cottage Building is designed for long-term everyday use.

Key construction highlights include:

- Pressure-treated flooring for added durability and longevity
- Three pressure-treated skid-mounted base supports
- Standard formed ridge cap designed to provide a more secure roof while promoting ventilation
- Built-to-order construction
- Standard 6-foot side walls with optional 7-foot and 8-foot upgrades
- Wide door opening for easier access to stored equipment and larger items

Every building is manufactured using premium materials selected for dependable quality and performance.

Customization Options

Customize your 8×16 Cottage Building to better suit your needs with available options, including:

- Custom exterior color selections
- Door upgrades (ask your dealer for available options)
- 7-foot sidewall upgrade
- 8-foot sidewall upgrade
- Built-to-order configuration

Important: An 8-foot sidewall upgrade is highly recommended if adding roll-up doors, as standard sidewalls will reduce the available door height.

Standard Features

- Building Size: 8×16
- Built-to-order construction
- Turnkey building
- Standard 6-foot sidewalls
- Optional 7-foot or 8-foot sidewalls
- 48" × 68" door opening
- Three pressure-treated skid-mounted base
- Pressure-treated flooring
- Standard formed ridge cap for improved roof security and ventilation
- Premium construction materials
- Custom color options available

- Door upgrades available

Financing & Rent-To-Own

Handi-House offers multiple purchasing options to help make ownership more convenient.

Available options include:

- No Credit [Check Rent-To-Own*](#)
- 24, 36, 48, or 60-month Rent-To-Own terms*
- Special financing available for up to 60 months (restrictions apply)
- Cash discounts available on Handi-House buildings

Warranty Coverage

Portable buildings include:

- 30-year warranty on metal
- 10-year warranty on framing
- 20-year warranty on pressure-treated lumber

Delivery & Installation

Your 8×16 Cottage Building is offered as a turnkey solution.

Installation includes:

- Professional installation and leveling
- Buildings are leveled using concrete blocks
- Buildings are not placed directly on the ground using wood leveling wedges

Delivery and installation details may vary by location. Contact your local Handi-House dealer for complete information.

Is This the Right 8×16 Cottage Building for You?

The 8×16 Cottage Building is an excellent option for homeowners who need more storage than a small shed while keeping a manageable footprint. It's well suited for storing outdoor equipment, organizing household belongings, creating a hobby area, or serving as a versatile portable cabin or compact tiny home-style project where appropriate.

If you expect to store larger equipment or require additional workspace, exploring larger building sizes may provide greater flexibility.

Before purchasing any prefab structure, it's important to compare building sizes, materials, customization options, financing, and installation requirements. Be sure to [explore our Buyer's Guide to Buying a Prefab Building](#) to help you choose the right building for your property and long-term needs.
