Product Description

20W x 36L x 10H - Steel Garage with Dual Drive-In Openings and Custom Layout Options

This 20x36x10 metal garage is a [prefabricated steel garage](#) designed for residential and light commercial use, offering a flexible solution for vehicle storage, equipment protection, or workshop space. Built with durable steel materials and customizable layout options, it is suited for property owners looking for a functional, ready-to-install building with multiple access points and design flexibility.

Best For

- Residential vehicle storage
- Light workshop or hobby use
- Equipment and tool storage
- Small business or commercial storage needs
- Multi-access parking and organized garage setups

What Fits Inside

With a 20-foot width and 36-foot length, this building provides practical space for organized storage and parking configurations.

- Can accommodate vehicles depending on layout and door positioning
- Suitable for compact dual-vehicle storage with dual drive-in access
- Ample space for shelving, tools, and work areas along interior walls
- Flexible interior layout for mixed storage and workspace use

Because of the dual 8x8 drive-in openings, this structure can support more efficient entry and exit access for multiple smaller vehicles or a split-use configuration, depending on how the interior is arranged.

Build Quality & Materials

This structure is built using durable steel components designed for long-term use and structural strength.

- 26 gauge steel wall and roof panels
- 14 gauge framing (upgrade available)
- Engineered for 150-170 wind load ratings
- Factory-built steel construction for consistent fit and finish

These materials are selected to provide a strong and stable structure suitable for varied residential and commercial applications.

Customization Options

This building includes multiple configuration options to fit different needs:

- [15+ color options available](#)
- Engineering plans available
- Optional framing upgrades
- Additional design adjustments available through [Shed and Steel 3D builder tools](#)

Standard Features / Specifications

- Dimensions: 20W x 36L x 10H
- Frame note: Frame is 1 ft shorter than roof lengthwise
- Steel panels: 26 gauge
- Framing: 14 gauge (upgrade available)

 - (1) walk-in door
- Color options: 15+ available
- Engineering plans available

Delivery & Installation

- Factory-direct pricing
- Free delivery included
- Free installation included
- Permit service available for select locations and requirements

Decision Guidance

This 20x36x10 steel garage is a strong fit if you need a mid-sized structure with flexible access points and multiple use options.

Choose this size if:

- You need a compact to mid-size garage with organized storage capacity
- You want dual drive-in access for convenience or multiple vehicle positioning
- You plan to use part of the space as a workshop or storage area

You may need a larger option if:

- You require full side-by-side vehicle storage for larger vehicles
- You need significant workspace separation from storage zones

A smaller option may be suitable if:

- You only need single-vehicle storage with minimal additional space
